DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 37-38 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Galli et al (US 3,781,596).

Galli discloses that in Fig. 10, 71 is etched to form a plurality of wiring lines (col. 9, lines 10-11) on a surface of a core layer 10, and further etching 71 using mask 74 to form a different thickness first portion 12 than a second portion 13 (Fig. 1a). Fig. 2 shows first portion of one line with 13 is parallel with another line with 12, other than the one next to 13. Any one of the wiring lines have third and fourth portions and first and third portions are parallel. Galli discloses all the steps in the claims and structures. Thus, cross-talk noise between adjacent two wiring lines is reduced.

Response to Arguments

3. Applicant's arguments filed 5/31/06 have been fully considered but they are not persuasive.

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., $V=V_k \times TWT_i$ ($Tr \ 2 \times Td$) and related subject matter) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not

Art Unit: 3729

read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Galli discloses all the steps in the claims and structures. Thus, cross-talk noise between adjacent two wiring lines is reduced.

Interviews After Final

4. Applicant note that an interview after a final rejection must be submitted briefly in writing the intended purpose and content of the interview (the agenda of the interview must be in writing). Upon review of the agenda, the Examiner may grant the interview if the examiner is convinced that disposal or clarification for appeal may be accomplished with only nominal further consideration. Interviews merely to restate arguments of record or to discuss new limitations will be denied. See MPEP 714.13 and 713.09.

Conclusion

5. Please provide reference numerals (either in parentheses next to the claimed limitation or in a table format with one column listing the claimed limitation and another column listing corresponding reference numerals in the remark section of the response to the Office Action) to all the claimed limitations as well as support in the disclosure for better clarity (optional). Applicants are duly reminded that a full and proper response to this Office Action that includes any amendment to the claims and specification of the application as originally filed requires that the applicant point out the support for any amendment made to the disclosure, including the claims. See 37 CFR 1.111 and MPEP 2163.06.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3729

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
